

Waterproof DS18B20 Temperature Temp Sensor Digital Thermal Probe

Produktkode: 594aa
Tilgjengelighet: 3

Pris: kr. 55,00

Short Description

Waterproof DS18B20 Temperature Temp Sensor Digital Thermal Probe 1M For Arduino

Beskrivelse

1.Brand New High Quality

2.The probe the temperature sensor DS18B20 original chip

3.High quality stainless steel tube encapsulation waterproof moistureproof prevent rust

4.Stainless steel shell 6*50mm

5.Power supply range: 3.0V to 5.5V

6.Operating temperature range: -55°C to +125°C (-67°F to +257°F)

7.Storage temperature range: -55°C to +125°C (-67°F to +257°F)

8.Accuracy over the range of -10°C to +85°C: ±0.5°C.

9.No other components, unique single bus interface

10.Output lead: red (VCC), yellow(DATA) , black(GND)

11.Cable length: 100 cm

Package Included:

1 x Waterproof DS18B20 Temperature Temp Sensor Digital Thermal Probe For Arduino
